

SmartPDF All In One — API Documentation + User Stories + Flows

1. API Documentation (REST)

Base URL (example):

`https://api.smartpdf.app/v1/`

1.1 Authentication API

POST /auth/register

Register a new user. **Body:**

- name
- email
- password

POST /auth/login

Returns JWT token. **Body:**

- email
- password

GET /auth/profile

Fetch logged user info.

POST /auth/refresh-token

Refresh JWT.

1.2 File Upload & Management

POST /files/upload

Upload PDF/image.

- Multipart upload
- Returns file_id + storage_url

GET /files/{file_id}

Fetch metadata.

DELETE /files/{file_id}

Delete file.

1.3 OCR API

POST /ocr/run

Run OCR using server AI. **Body:**

- file_id
- language (ar/en/...)

Response:

- job_id

GET /ocr/status/{job_id}

Get OCR job status.

GET /ocr/result/{job_id}

Returns extracted text.

1.4 Translation API

POST /translate/text

Translate extracted text. **Body:**

- text
- source_lang
- target_lang

POST /translate/document

Translate full PDF. **Body:**

- file_id
 - source_lang
 - target_lang
-

1.5 AI Processing API

POST /ai/summary

Summary of PDF text. **Body:**

- file_id
- length (short/medium/long)

POST /ai/extract

Extract info from PDF (tables, names...).

POST /ai/clean-copy

Remove watermark / noisy formatting.

1.6 Conversion API

POST /convert/pdf-to-word

Convert PDF to Word. **Body:**

- file_id

POST /convert/word-to-pdf

Convert Word to PDF.

1.7 PDF Tools API (Server-assisted)

POST /pdf/compress

Compress PDF.

POST /pdf/merge

Merge two or more PDFs.

POST /pdf/split

Split into pages.

POST /pdf/rotate

Rotate pages.

1.8 Subscription API

GET /subscription/plans

List plans.

POST /subscription/subscribe

Upgrade user.

GET /subscription/usage

Monthly usage.

=====

2. USER STORIES

=====

2.1 Core User Stories

US-01 — View PDF

“As a user, I want to open and view PDFs without ads interrupting me.”

US-02 — Translate Text

“As a user, I want to select text inside a PDF and translate it instantly to any language.”

US-03 — Translate Full Document

“As a user, I want to translate the whole PDF to a different language and export it.”

US-04 — OCR

“As a user, I want to extract text from scanned documents accurately.”

US-05 — AI Summary

“As a user, I want an AI summary so I can read a shorter version of long PDFs.”

US-06 — AI Extract

“As a user, I want to extract tables, dates, and key info from PDF automatically.”

US-07 — Convert PDF to Word

“As a user, I want to convert scanned/normal PDF to Word with formatting.”

US-08 — PDF Tools

“As a user, I want to merge, split, rotate, and compress PDFs.”

US-09 — Offline Tools

“As a user, I want to use basic tools even without internet.”

US-10 — Subscription Upgrade

“As a user, I want to upgrade to Pro/Ultimate to remove limits.”

2.2 Edge User Stories

EUS-01 — Handwriting OCR

“As a professional, I want to extract handwriting text from notes.”

EUS-02 — Clean Copy

“As a user, I want to remove background noise and watermarks.”

EUS-03 — Sync Files Across Devices

“As a user, I want to access my PDFs across devices using cloud sync.”

3. FLOWCHARTS & PROCESS FLOWS

3.1 PDF → OCR → Translate Flow

```
graph TD
    A[User → Select File → Open] --> B[Press OCR Button]
    B --> C[Choose Mode (Local / Server)]
    C --> D[IF Local → Run Tesseract → Show Text]
    C --> E[IF Server → Upload to API → Celery → OCR Model → Return Text]
    D --> F[User Press Translate]
    E --> F
    F --> G[Translation Model → Return Output]
    G --> H[Export as PDF/Word/Text]
```

3.2 Convert PDF → Word Flow

```
graph TD
    A[User → Upload File] --> B[API → Convert PDF to Images (if scanned)]
    B --> C[OCR Layer (if needed)]
    C --> D[Layout Reconstruction Engine]
    D --> E[Build .docx File]
    E --> F[Return to User]
```

3.3 AI Summary Flow

User → Upload File
↓
Extract Text
↓
Send to AI Summary Model
↓
Generate Summary
↓
Return & Display

3.4 Merge PDF Flow

User Select Files
↓
Send to API / or Local Merge
↓
Combine Pages
↓
Return Merged PDF

3.5 Translation (Full Document) Flow

User → Select "Translate Document"
↓
Extract Text From PDF
↓
Split Into Chunks
↓
Send to Translation Model
↓
Reconstruct New PDF
↓
Return Translated PDF

4. Final Notes

هذا الملف يحتوي على كل ما يخص:

- بالكامل API توثيق الـ

- للتطوير User Stories الـ
- المطلوبة لبناء الذكاء الاصطناعي وعمليات السيرفر Flows الـ
